Team Dynamics

Tuckman's Model

Concept of development & dynamics in small groups. Describe the stages that team follow on their way to be high performance.

Bruce W Tuckman

4 Stages of
Group
Development

Forming Stage

1. Allow team to know each other
2. Discover personal and team goals
3. Teaching & mentoring often needed

- Team newly formed
- Mostly works individually
- Unsure of team's purpose
- Various feeling like anxious, curious or excited

Storming Stage

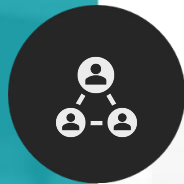

- People start pushing boundaries
- Personal characters surface and clash with others
- Conflict or friction start to arise

1. Help the team focus on common goal and build thrust
2. Closely monitor team's conflict
3. Mediation and facilitation often needed

- Gradually teams found new norms
- People start to resolve their differences, appreciate and respect one another's
- Friendly interaction filling the atmosphere

Norming Stage

1. Allow the team to self-organize and bond further
2. Reinforce commitment towards team's goal
3. Help the team measure their effectiveness and efficiency

Performing Stage

- Team effectively and efficiently achieve their goal
- High level of confidence fill up the atmosphere
- Individual differences are appreciated and treated as an opportunity

1. Bring up more challenges, dare the team to experiment on their products and processes
2. Shift focus from output towards outcomes
3. Maintain sustainability while trying to scale up/out

Team Dynamics

Identify
Identify which stage
your team at

Level Up
Consider what your team need
to move to the next stage

Review
Regularly review where your team at
and adjust your behaviour
accordingly

Outline

Team Dynamics

**Conflict
Management**

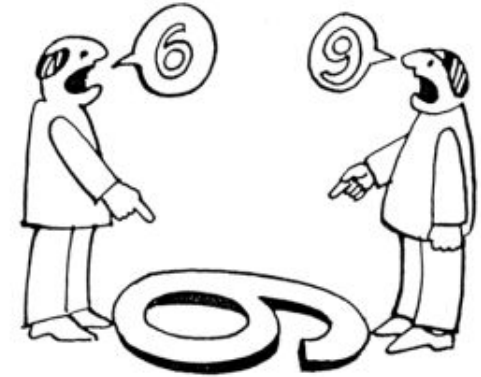

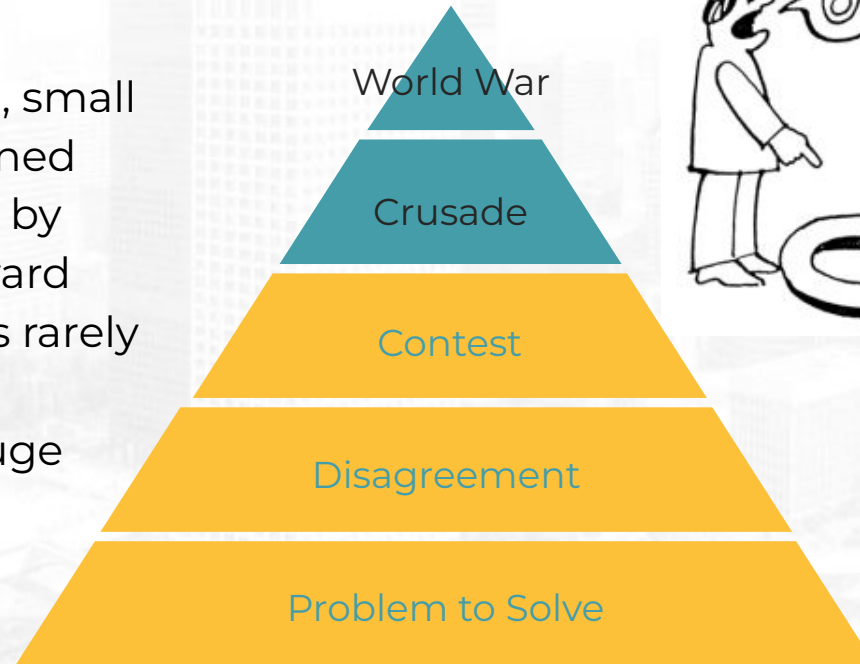

Team Evaluation

Conflict Management

Level of Conflict

- There are multi level of conflict
- Not every conflict is bad, small friction are often happened and sometimes needed by your team to move forward
- Higher level of conflict is rarely happened but once happening, there are huge risk awaits

Level 1

Problem to Solve

Do Nothing

- People arguing whether their approach are better than others while still aiming for the same purpose
- It's healthy conflict
- Observe as the situation might escalate

Level 2

Disagreement

Create Awareness

- People debating towards different direction and purpose
- Give clue or hints
- Help reveal information that might be hidden or incomplete
- Build common understanding

Level 3 Contest

Facilitate

- People feel that they are more superior than others, or it is how things should be, therefore others argument are invalid
- Facilitate the resolution
- Acknowledge their concern, find common ground then build resolution on top

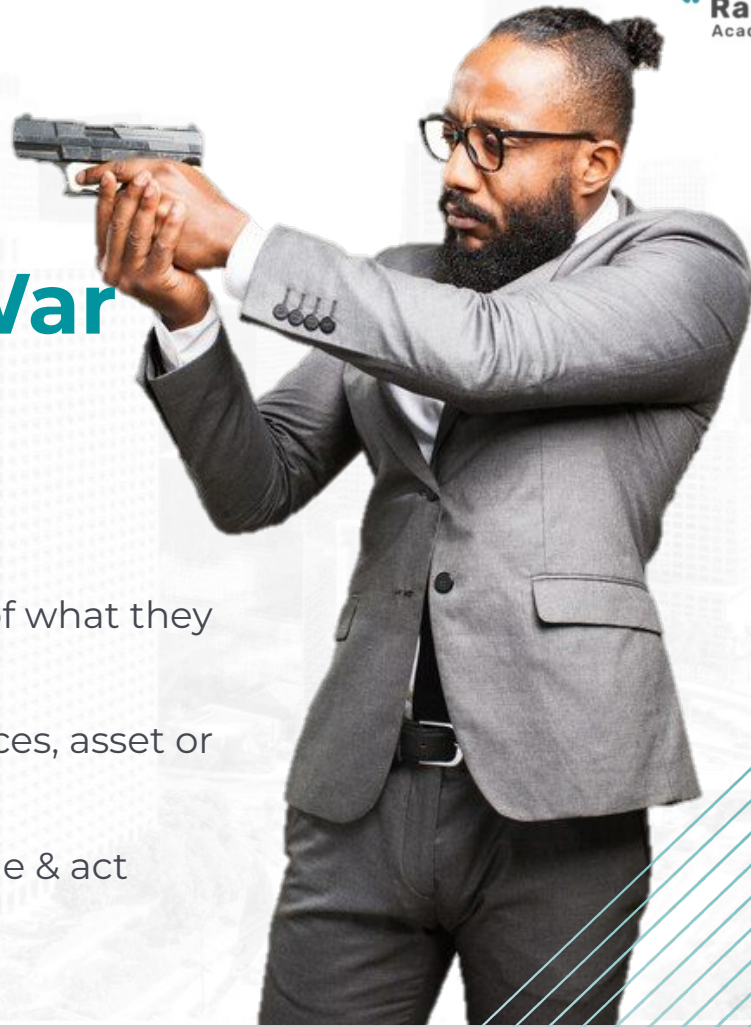

Level 4 & 5

Crusade & World War

Act...!!

- People sabotage each other's progress
- They literally hurt each other for the sake of what they believe is right
- The conflict cost your organization resources, asset or opportunity lost
- Lead the resolution, share intention, decide & act
- Take immediate action if needed

Outline

Team Dynamics

**Conflict
Management**

Team Evaluation

Team Evaluation

Focus towards our goals

Strategic Goal

Big and far away with many uncertainties along the journey. Use empiricism on organization level.

Intermediate Goals

Achievements indicating the organization is on its way towards strategic goals, often still uncertain but not wholly unknown

Tactical Goals (Immediate Goals)

Critical shorter-term objectives which the team will work toward intermediate goals

Starting State – Where the organization starts its journey in relative to the strategic goal.

Current State – where the organization is currently relative to the strategic goal

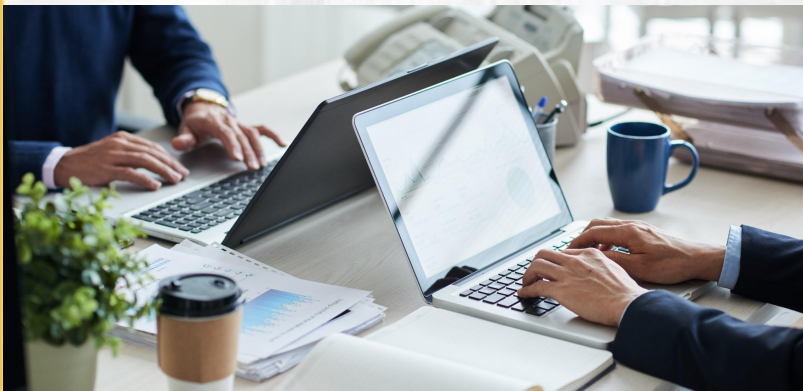

Organizations invest in agile processes, tools, training and coaching, but how much are they getting back?

Start by looking at Value

1. Has the product delivery improved?
2. How happy are the customers?
3. Are employees satisfied and enabled?
4. How agile our team?

Understanding What is Valuable

Measuring activities or outputs is easier, however delivering valuable outcomes to customers is essential to reach the organization's goals

Activities

Things that people in the organization do, such as performing works, holding meetings & events, discuss, writing code, create reports etc

Outputs

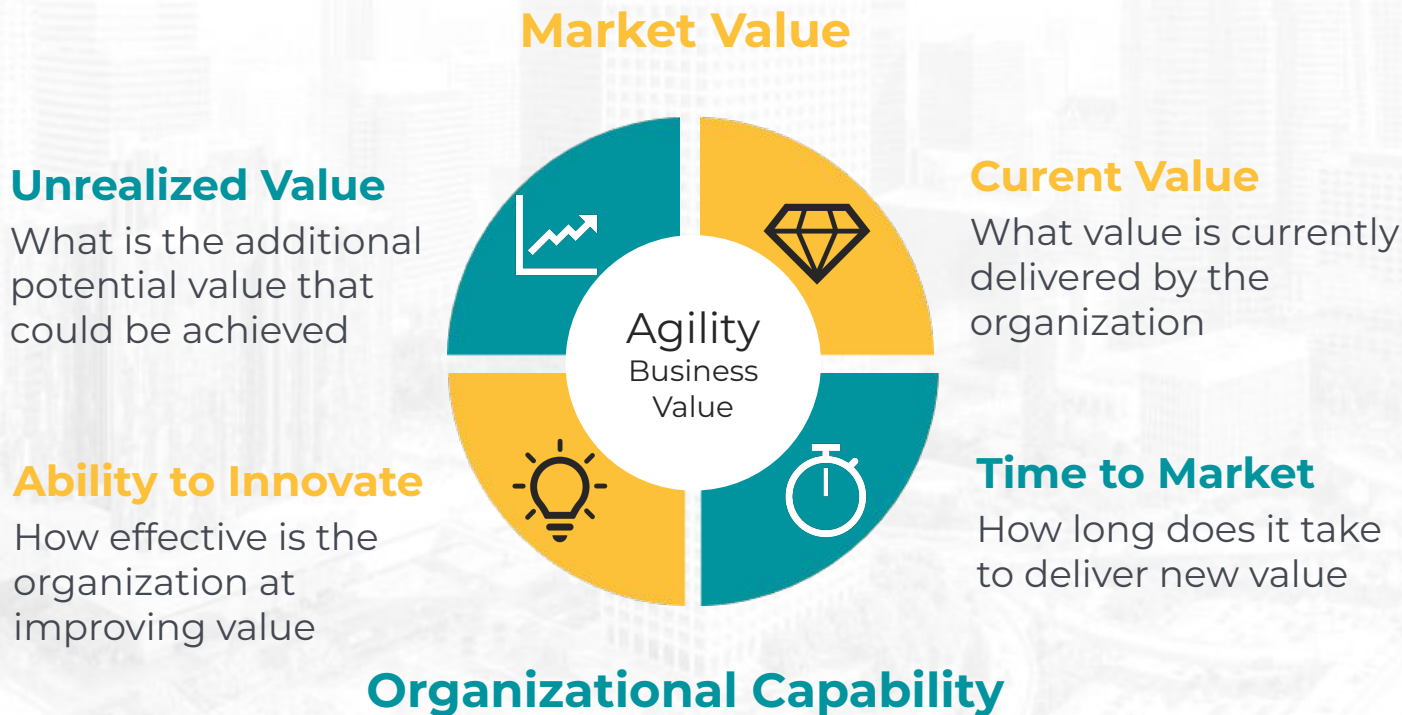

Things that the organization produces such as product releases, features, reports, meeting notes, documentations, etc

Outcomes

Desirable things that the customer or user experiences as the impact of the presences of the output. new or improved capabilities.

Key Value Areas

Sprint Review and Retrospective

Outline

1

Sprint Review

2

Sprint Retrospective

3

Sprint

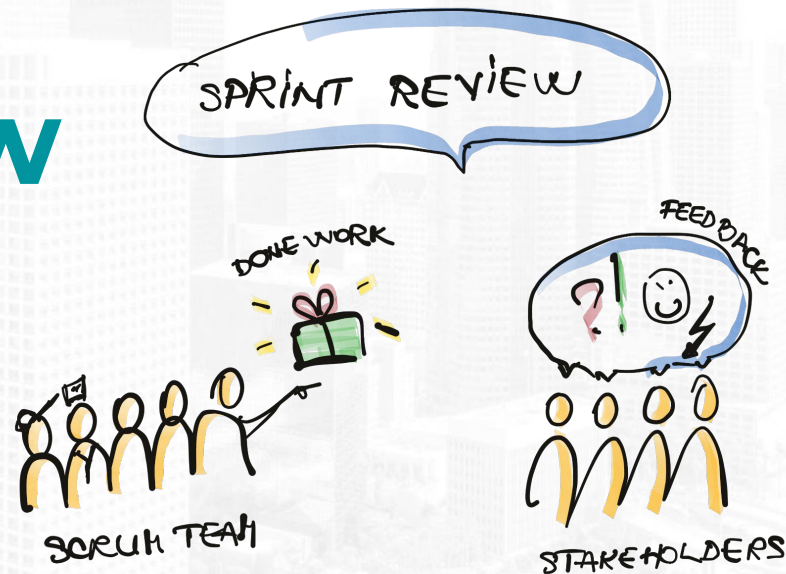

Events

Sprint Review

What is Sprint Review?

The purpose of the Sprint Review is to inspect the outcome of the Sprint and determine future adaptations.

Sprint Review

✓ **Who Attend ?**

The Scrum Team and Stakeholders
users, other teams, managers, investors,
sponsors, customers, etc

✓ **Timebox ?**

A maximum of four hours for a
one-month Sprint. For shorter Sprints,
the event is usually shorter.

✓ **When/Where it is done ?**

End of Sprint

Sprint Review : The How

During the event, the Scrum Team and stakeholders review what was accomplished in the Sprint and what has changed in their environment. Based on this information, attendees collaborate on what to do next. The Product Backlog may also be adjusted to meet new opportunities. The Sprint Review is a working session and the Scrum Team should avoid limiting it to a presentation.

What to check at a Sprint review ?

- Product Increment
- Current Product Backlog
- Sprint Flow
- Timeline and Budgets
- Market conditions
- Steps to optimize the product value

Sprint Review : The Roles

- **Stakeholders**

- Show up
- Understand the Sprint Goal
- Ask Questions / Feedback
- Be Open

- **Product Owner**

- Invite the right Stakeholders
- Set the Context
- Nail the Logistic

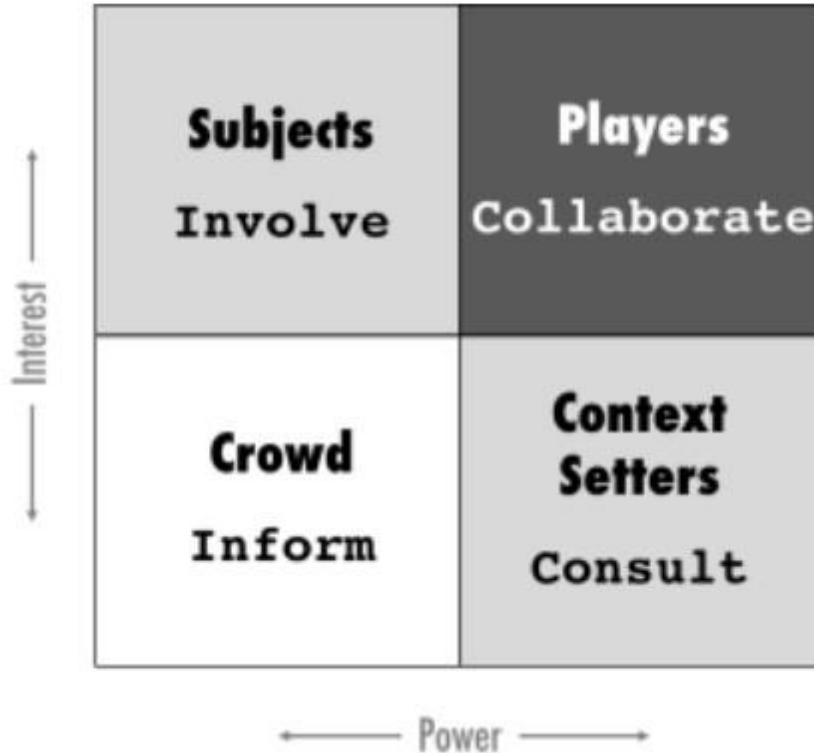

- **The Developers**

- Be Present & Engaged
- Talk in terms of business value

- **The Scrum Master**

- Ensure the Sprint Review happens
- Coach the Scrum Team

Stakeholder

Power vs. Interest framework by Fran Ackermann and Colin Eden, from their book Making Strategy

Stakeholder

Stakeholder Group	Engagement	Frequency	Sample Techniques
Players	Collaborate	Once per Sprint	Collaborative workshops including strategy and roadmap workshops, sprint review meetings
Subjects	Involve	Monthly	Sprint Review
Context Setters	Consult	Quarterly	one on one meeting
Crowd	Inform	Quarterly	Newsletter

Sprint Review : More than just a Demo

“Too many Scrum Teams approach the Sprint Review as their moment to show progress, to give a ‘product update’, to sell what was built to stakeholders or to talk about what they did.”

The Sprint Review is more than just a Demo. The Sprint Review is a place to discuss the marketplace changes, examine the completed Sprint as an event, update the release schedule, discuss the Product Backlog and the possible focus for the next Sprint. This is where the dialog between the Scrum Team and the stakeholders takes place and feedback on product Increment is obtained.

Sprint Review Anti-Patterns

- ✗ Reporting Status
- ✗ Acceptance Gate by PO
- ✗ PowerPoint presentations

Sprint Review : The Approaches

- **Shift & Share** — the science fair approach: Members of the Scrum Team present different elements of the Product Increment to the whole group by screen sharing.
- **User Experience Fishbowl** — The UX Fishbowl is an effective follow-up to Simple Ethnography.
- To cover **1-2-4-All**, we need breakout rooms and a place to aggregate the findings.

The Scrum Team and Stakeholders use the **Sprint Review** to inspect the Product Increment, Product Backlog (& Progress), Market & Business condition. Do Adaptation through Product Backlog.

What to Review ?

Review timeline, budget, impediments, capabilities, and marketplace.
Inspection and adaptation isn't just about the product you are building.

Outline

1

Sprint Review

2

Sprint Retrospective

3

Sprint

Events

Sprint Retrospective

What is Sprint Retrospective?

The purpose of the Sprint Retrospective is to plan ways to increase quality and effectiveness.

Sprint Retrospective

✓ **Who Attend ?**

The Scrum Team

✓ **When/Where it is done ?**

End of Sprint

✓ **Timebox ?**

A maximum of three hours for a one-month Sprint. For shorter Sprints, the event is usually shorter.

How to conduct ?

The Scrum Team inspects how the last Sprint went with regards to individuals, interactions, processes, tools, and their Definition of Done. Inspected elements often vary with the domain of work.

5 Stages of a Retrospective

1. Set the Stage
2. Gather Data
3. Generate Insights
4. Decide what to do
5. Close the Retrospective

5 Stages of Retrospective

1. Set the Stage

Setting the stage is the step of initiating the retrospective. We welcome the folks in the room, give some context about what it is a retrospective and why we do them (if the team is inexperienced), but also setting the tone and making the team feel invited, comfortable and open enough to have a productive session. That includes a walk-through on how the session is structured and how people are expected to participate. Read aloud the Prime Directive :

"Regardless of what we discover, we understand and truly believe that everyone did the best job they could, given what they knew at the time, their skills and abilities, the resources available, and the situation at hand."

5 Stages of Retrospective

2. **Gather Data**

Start with the hard data: events, metrics, features or stories completed, and so forth.

Metrics include burndown charts, velocity, different counts, numbers of stories completed, and so forth.

Thorough data gathering, and including both facts and feelings, leads to better thinking and action in the rest of the retrospective. Without a shared picture, people are working from a narrow set of data-their own.

3. **Generate Insights**

Generating insights help the team to step back, see the big picture, and delve into root cause. These insights allows the team see how to work more effectively - which is the ultimate goal of any retrospective.

5 Stages of Retrospective

4. **Decide to Do**

At this point, the team has a list potential experiments and improvements. Now is the time to pick the top items and plan what to do. Be sure that people sign up and commit to task. Without individual commitment, people assume that 'the team' will do the task, and then no one does it.

5. **Close the Retrospective**

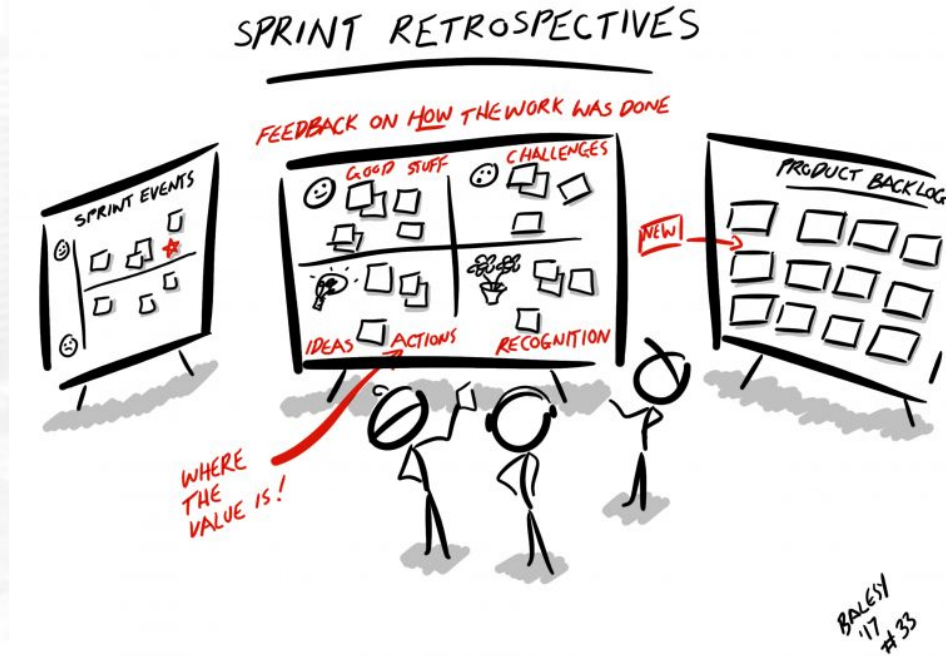

Close the retrospective with an appreciation for the hard work everyone did both during the iteration and during the retrospective.

Structure example of a 2-hour Retrospective

Set the Stage	~ 5%	~ 6 mins
Gather Data	~ 30-50%	~ 40 mins
Generate Insights	~ 20-30%	~ 25 mins
Decide what to do	~ 15-20%	~ 20 mins
Close the Retrospective	~ 10%	~ 12 mins
Shuffle Time	~ 10-15%	~ 17 mins
Total	~ 100%	~ 120 mins

Scrum Retrospective

Anti-Patterns

- ✗ Blame Game
- ✗ No Accountability
- ✗ Prisoners
- ✗ No psychological Safety

Scrum Retrospective Techniques

1. Starfish retrospective
2. Lessons learned retrospective
3. Sailboat retrospective
4. Quick retrospective
5. 4L retrospective
6. Start, stop, continue
7. Feedback grid
8. Mad sad glad retrospective
9. Hot air balloon retrospective

What went well Retrospective : The What

This is a very common retrospective activity. It is direct and straight to the point: What went well? Not so well? Do you have any new ideas? It is definitely a great option for teams getting used to retrospectives.

An easy retro format

*WHAT
WENT WELL*

*WHAT COULD
HAVE BEEN
BETTER*

*WHAT WILL
WE CHANGE?*

What went well Retrospective

- **Well** – things that went well, that moves us forward, helps us get better. We want to repeat these!
- **Not so well** – things that went wrong, that need improvement, that hold us back. We want to eliminate or avoid these!
- **New ideas** – things that we should consider trying, suggestions, new ideas.

What went well Retrospective : The How

1. Ask participants to add notes to each of the three areas.
2. Vote to pick the Topics
3. Conversations and action items.

Sailboat Retrospective : The What

The metaphor is that the team is on a boat together, headed toward an island, but they must navigate clouds and winds, try not to be slowed by anchors, and avoid rocks and pirates along the way.

Sailboat Retrospective : The Metaphor

- **The tropical island** represents the set sprint goal they have aimed to achieve in their daily work during the sprint.
- **The Wind** represents everything helping them to achieve the sprint goal, pushing the team's sails boat to go even faster.
- **The Sun** represents all the things making them feel good and happy during work. As a retrospective is a time for team celebration this is a highly appreciated topic to bring up and an opportunity to bring forward kudos to your team friends.
- **The Anchor** on the Sailing boat represents everything that is slowing us down and holding us back on the journey towards the sprint goal.
- **The Reef** represents potential risks ahead that we see will jeopardize future sprint work.

Sailboat Retrospective : The How (1)

- **Set the stage** - start the Retrospective by introducing the team of the sailboat metaphor.
- **Reflect and write individually** - Give each team member 7 min to individually write down stickies on the board in the different areas of the sailboat canvas.
- **Present and discuss in pairs** - Have breakout sessions with 2 (or 3) persons in each breakout room where they present their stickies to each other.
- **Summarize** - Each pair summarize the discussion during breakout so all team members can hear what has been discussed. Opportunity to ask questions if any.

Sailboat Retrospective : The How (2)

- **Group stickies** - In case of more than one sticky with the same topics the team agrees upon grouping them together.
- **Voting** - Time for team voting on the topic(s) that needs focus going forward. It could be topics helping the team go forward so they need continue with these to keep momentum, or topics related to what is slowing them down or potential risks coming up.
- **Find Actions** - Based on the highest voted topic(s) the teams agree on improvement action going forward in the next sprint.

The Scrum Team use the Retrospective to inspect the Team Collaboration, Technology & Engineering, and Definition of Done..
Do Adaptation through Actionable improvements..

Before you end, take a few minutes to perform a retrospective on the retrospective. Look at what went well and what you could do differently in the next retrospective. “Inspect and Adapt” applies to retrospectives. too.

Sprint Review

2

Sprint Retrospective

3

Sprint

Events Sprint

What is Sprint ?

Sprints are the heartbeat of Scrum, where ideas are turned into value.

Sprint : Duration

They are fixed length events of one month or less to create consistency. A new Sprint starts immediately after the conclusion of the previous Sprint.

The choice of Sprint length is best decided upon by the Scrum Team with respect to two main qualities:

- The Sprint length should be long enough to enable a Development Team to provide a potentially releasable product Increment that is usable and can provide meaningful feedback data
- The Sprint length should be short enough to provide as many opportunities as possible to adapt to the feedback data generated

Sprint :

All the work necessary to achieve the Product Goal, including Sprint Planning, Daily Scrums, Sprint Review, and Sprint Retrospective, happen within Sprints. During the Sprint:

- No changes are made that would endanger the Sprint Goal;
- Quality does not decrease;
- The Product Backlog is refined as needed; and,
- Scope may be clarified and renegotiated with the Product Owner as more is learned.

Sprint : The Do & Don't

Do :

- Make sure the team sets and understands the sprint goal and how success will be measured.
- Do ensure you have a well-groomed backlog with your priorities and dependencies in order.

Don't :

- Don't pull in too many stories,
- Don't forget about quality or technical debt
- Don't let the team have a fuzzy view of what's in the sprint

Sprints enable predictability by ensuring inspection and adaptation of progress toward a Product Goal at least every calendar month.

Various practices exist to forecast progress, like burn-downs, burn-ups, or cumulative flows. While proven useful, these do not replace the importance of empiricism. In complex environments, what will happen is unknown. Only what has already happened may be used for forward-looking decision making.

Servant Leadership

Scrum Master's Accountabilities

Scrum Master's Accountabilities

Scrum Masters are **true leaders** who serve the Scrum Team and the larger organization (2020)

The Scrum Master is a **servant-leader** for the Scrum Team. (2017)

The Scrum Master is accountable for **establishing Scrum as defined in the Scrum Guide**. They do this by helping everyone understand **Scrum theory and practice**, both within the **Scrum Team** and the **organization**.

The Scrum Master is accountable for the **Scrum Team's effectiveness**. They do this by enabling the Scrum Team to **improve its practices, within the Scrum framework**.

'I' Shape
Expert in one area.

'T' Shape
Expert in one area
with knowledge in
other areas.

'M' Shape
Expert in many areas
with knowledge in
other areas.

Scrum Master: Accountabilities

In Organization

- Leading, training, and coaching the organization in its Scrum adoption;
- Planning and advising Scrum implementations within the organization;
- Helping employees and stakeholders understand and enact an empirical approach for complex work; and,
- Removing barriers between stakeholders and Scrum Teams.
- Etc

With Product Owner

- Helping find techniques for effective Product Goal definition and Product Backlog management.
- Helping the Scrum Team understand the need for clear and concise Product Backlog items;
- Helping establish empirical product planning for a complex environment; and,
- Facilitating stakeholder collaboration as requested or needed
- Etc

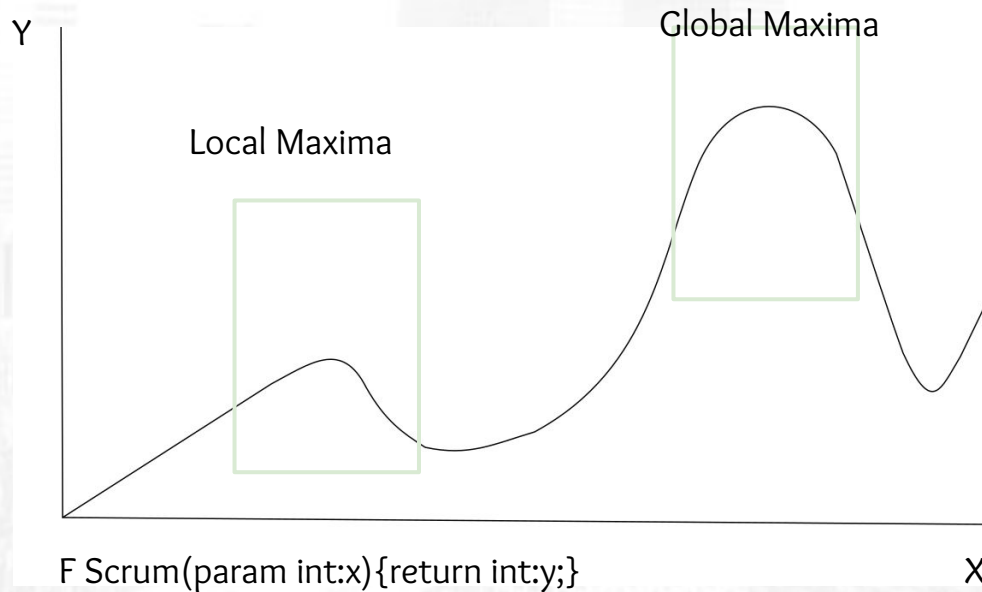

With Scrum Team

- Coaching the team members in self-management and cross-functionality;
- Helping the Scrum Team focus on creating high-value Increments that meet the Definition of Done;
- Causing the removal of impediments to the Scrum Team's progress; and,
- Ensuring that all Scrum events take place and are positive, productive, and kept within the timebox
- Etc

Scrum **beyond** software development

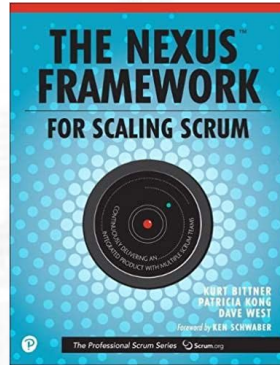

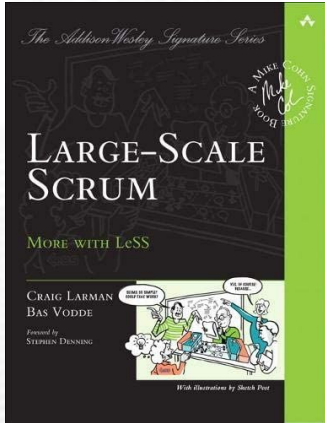

Start & find your local maxima to get a global maxima

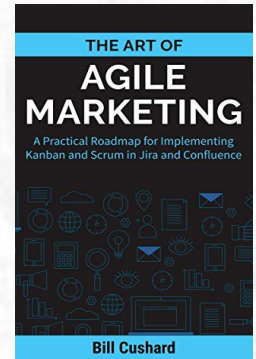

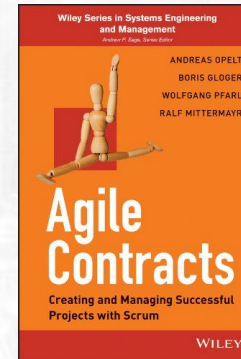

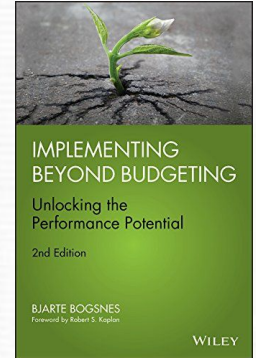

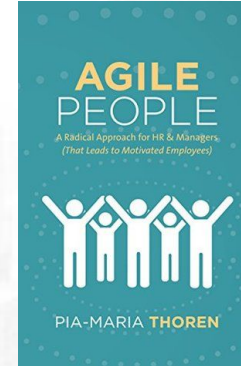

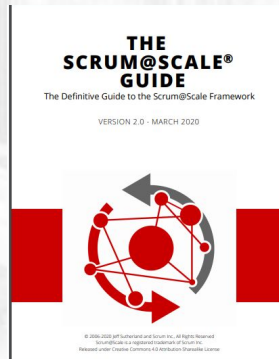

Remember that Scrum is not just for a Team

Multiple Hats of Scrum Master

Scrum Master in Practice

1. The Scrum Master as a Servant Leader
2. The Scrum Master as a Coach.....
3. The Scrum Master as a Facilitator
4. The Scrum Master as a Teacher.....
5. The Scrum Master as a Mentor
6. The Scrum Master as a Manager
7. The Scrum Master as an Impediment Remover
8. The Scrum Master as a Change Agent.....

Selecting Hats for Scrum Master - Coaching

What is Coaching?

ICF defines coaching as partnering with clients in a thought-provoking and creative process that inspires them to maximize their personal and professional potential.

Coaching is a client-driven process.

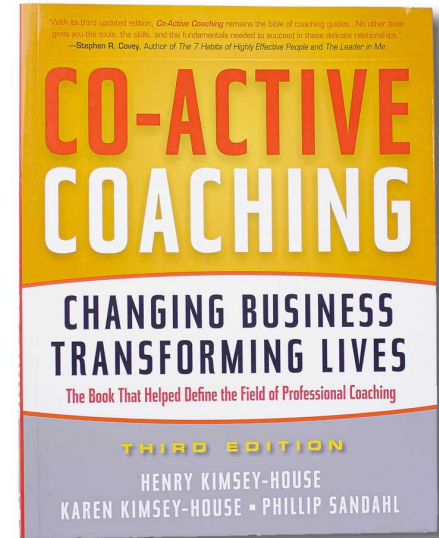

- Discover, clarify and align with what the client wants to achieve
- Encourage client self-discovery
- Elicit client-generated solutions and strategies
- Hold the client responsible and accountable

The coaching process helps clients improve their outlook on work and life, while improving their leadership skills and unlocking their potential.

Coaching Model

- 1 **GROW Coaching Model**
- 2 **FUEL Coaching Model**
- 3 **OSKAR Coaching Model**
- 4 **CLEAR Coaching Model**
- 5 **STEPPPA Coaching Model**

Clear Coaching Model

Contract

Build rapport & coaching agreement, establish goal & basic rules around the coaching sessions

Listen

3 Levels Active Listening. Coach try to understand the situation, looks for clarity, & the connections.

Explore

Powerful Questions, Non violent communication, Help Coachee understand Goal & the action items

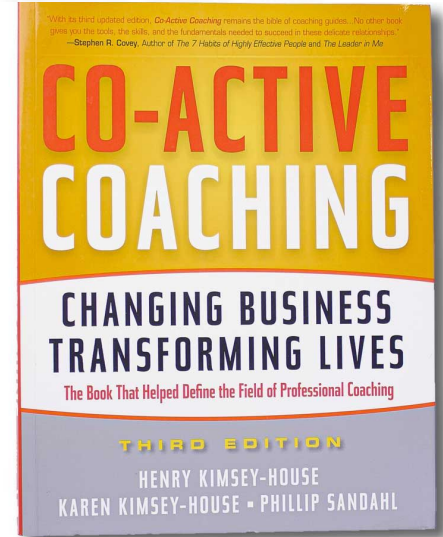

Action

Reordering priority, get things done, create some progress. Coach can help to remind, but Coachee remind accountable

Review

Towards the end of the session the coach plays back some of the key points from the session, reflecting on the contract objectives and what progress was made.

Begin with the end of mind (S. Covey)

- Use Coaching Stance as a primary Strategy to observe the situation
- Coach is a partner, it will help you stand your position as an SM
- Coaching model will help to build Servant-Leader Character
- When we get the Problem & Needs, we can deliver other stances with in a Coaching corridor

Outline

Servant Leadership

Servant Leadership

Servant Leadership Stance

Being Humble & Polite is not a sign that you are weak

Robert K Greenleaf (1970):

A Leader that
serve-first

Have conscious choice,
brings one to aspire to
lead

Do they served
grow as a person?

Build & Maintain: Leadership Strategy+Service Strategy

A leader that serve first

Imagine that you are a Parent:

- ☐ Are you doing their homework?
- ☐ What if they get a failure?
- ☐ What is your response to the picky eaters?
- ☐ did you give rewards based on their chores?
- ☐ Do you have a favorite kid?

it's more than Parenting

Adult to Adult partnership

Establish partnership agreement from the start

*Scrum Open Assessment will helps

Brings one to Aspire to Lead

What is a Leader? True leader?

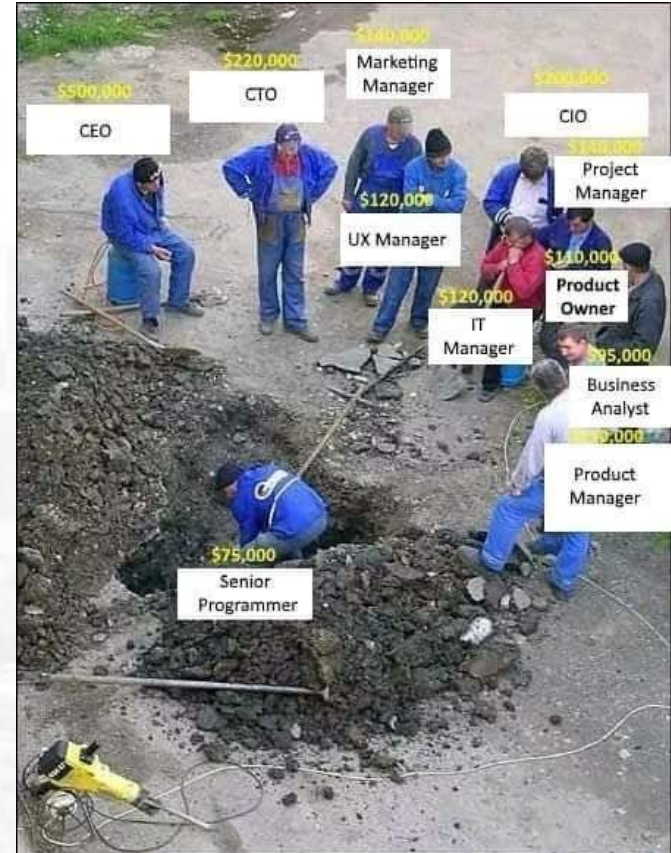

A True leader, did not create followers

They create voluntary followers & more leaders

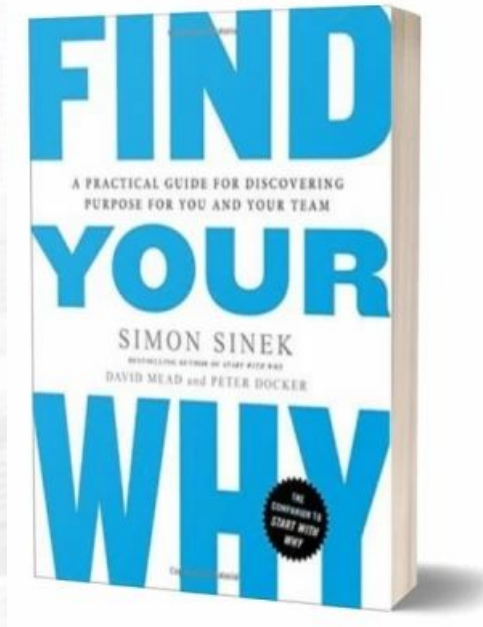

Inspirational Vision

Why People Inspired by you?

Why they want to follow you

Define who you are..

5 Forms of Power

- Punishment
 - Reward
 - Legitimation
 - Knowledge
 - Referent/Charm
- French & Raven-*

Outline

SM Accountabilities

Multiple Hats of SM

Servant Leadership

In a Summary

- ❑ Scrum Master is Master of Scrum, that helps Scrum Team & the Organization improve their practice using Scrum Framework
- ❑ in reality Scrum Master have several Stances, Characteristic & Expectation in term of benefit
- ❑ A True leader don't create followers, they create voluntary followers & more leaders
- ❑ Coaching stance will maintain our par relationship as a partner & keep our servant leadership characteristic

See ya again.. 🙌

Please do your “Homework” ✌️,
it will help to build your Muscle
Memory as a Master - Scrum Master 💪

Professional = Theory +
Practice
